EXPERIENCE

WORKONESIA

Founder

Madison, WI
Oct 2025 – Present

- Built and launched a cross-border hiring platform ([workonesia.com](https://www.workonesia.com)) connecting U.S. businesses with Indonesian remote talent using Next.js, Supabase, and GCP (Cloud Run, Cloud Storage)
- Led a founding engineer to build core product features, define technical architecture, and accelerate development
- Instrumented PostHog for product analytics, surfacing a critical bug affecting 42% of users at MVP launch
- Architected CI/CD pipeline using GitHub Actions for automated linting, typechecks, and Supabase migrations, with branch protection rules and a staging environment for pre-production testing
- Grew supply-side marketplace to 350+ vetted talents and facilitated 2 active client placements, generating early revenue and validating initial product-market fit

EPIC SYSTEMS

Software Engineer

Madison, WI
Mar 2023 – Jul 2025

- Designed and shipped a badge tap co-signature solution, reducing workflow time from 20 minutes to just 3 seconds; used by 42% of dental clients
- Designed and deployed an internal ChatGPT agent to answer onboarding questions for new employees, reaching #2 most-used AI agent company-wide
- Led migration of a legacy Visual Basic application to React and C#, coordinating 2 engineers and driving architectural decisions that improved response time by 55%
- Executed large-scale code migration, optimizing maintenance workflows and improving stability for 68% of healthcare organization clients
- Maintained and enhanced core features of a high-volume ambulatory system (React + C#), ensuring stable performance and long-term scalability

FACEBOOK

Software Engineer Intern

Menlo Park, CA
May 2021 – Aug 2021

- Improved search result relevance for person + school search by 5x
- Implemented NLP changes to enhance person + company search relevance
- Fixed NLP related bugs resulting in 1.8% overall capacity saving

TOKOPEDIA

Software Engineer Intern

Jakarta, Indonesia
Jun 2019 – Aug 2019

- Implemented Redis Caching to reduce traffic on commonly accessed data, reducing runtime by 2x
- Administered Cart reset upon address change to prevent out-of-area order
- Implemented Account Type Detection to ease user sign-in process

EDUCATION

UNIVERSITY OF ILLINOIS AT URBANA - CHAMPAIGN, GRAINGER COLLEGE OF ENGINEERING

Master of Computer Science, Bachelor of Science in Computer Science (BS-MCS)

Champaign - Urbana, IL
Dec 2022
GPA: 3.80/4.00

- Finished graduate-level CS courses in Software Engineering and Artificial Intelligence
- Member of Association for Computing Machinery (ACM) – SIGAI
- Member of Tau Sigma National Honor Society

SKILLS

TECHNICAL: React, Next.js, Supabase, GCP (Cloud Run, Cloud Storage), Git, Typescript, SQL, Python, C#, .NET

LANGUAGE: English and Bahasa Indonesia (Native or Bilingual proficiency)
